Vultr (The Constant Company, LLC)
Finance Hiring Team
319 Clematis Street, Suite 900
West Palm Beach, FL 33401

Dear Vultr Finance Team,

Vultr was self-funded for more than a decade before raising at a $3.5 billion valuation, and that detail is why I am writing. I have never worked at a company that size, but I know what it is to build something with your own money and make every dollar justify itself. The Senior Financial Analyst, FP&A seat you describe, working across the three-statement model, deployment economics, and scenario tooling alongside the Head of FP&A and CFO, is the kind of work I want to grow into. I hold a BS in Computer Science with a 3.8 GPA and am currently pursuing an MS in Finance and Investment Management at Sacred Heart University, where the concepts your posting names, unit economics, payback, IRR, and debt service coverage, are exactly what I am studying now.

I want to be direct: I do not have the five years of banking or FP&A experience you list. What I have instead is a record of teaching myself hard things and turning them into products people paid for. From 2022 to 2025 I taught myself MQL5 and NinjaScript, designed algorithmic trading tools for futures markets, and built software that generates futures trading strategies. I marketed it myself and sold packages to roughly five clients, producing four-figure revenue. I also did contract work converting clients' manual trading strategies into automated algorithms, which means sitting with someone, extracting the exact rules behind their decisions, and encoding them precisely enough that a machine can run them without error. That discipline, pulling the real terms out of how something actually works, is the same one your team applies to contracts and order forms. I am proficient in Python, comfortable in C#, and I understand cloud compute from the side of the person spinning up the workload, which matters when the business you are modeling is GPUs and data centers.

I also know what ownership looks like when there is no one else to hand the problem to. I founded Rodriguez Pressure Washing LLC and have run every part of it since 2023, from knocking on more than 1,000 doors to scheduling, buying and maintaining equipment, and keeping customers coming back. During my internship at Edward Jones I validated client records and researched investment strategies for senior management, work where a small error has real consequences for someone else. Playing D1 soccer for a team ranked third nationally in the NAIA, and earning the Champions of Character Award, taught me to prepare thoroughly, hold a high standard under pressure, and put the team ahead of myself.

I am hardworking, I learn fast, and I take real pride in getting things right the first time. If you are open to a candidate who brings a technical foundation and unusual drive rather than a conventional resume, I would welcome the chance to talk about how I can contribute to Vultr's planning and analysis engine. Thank you for your time and consideration.

Sincerely,

Diego Rodriguez
