Samsara Inc.
Finance Hiring Team
1 De Haro Street
San Francisco, CA 94107

Dear Samsara Finance Team,

Samsara is looking for a Senior Financial Analyst who can sit with Software and Firmware Engineering leaders, understand what they are spending on headcount and AI vendors, and turn that into forecasts leaders and investors can trust. I am applying because that is the specific kind of finance work I want to do, and because I bring something most finance candidates do not: I hold a BS in Computer Science with a 3.8 GPA, I have written and sold production software myself, and I am now pursuing an MS in Finance and Investment Management at Sacred Heart University. I understand how engineers work because I have done the work.

The clearest proof is what I built on my own between 2022 and 2025. I taught myself MQL5 and NinjaScript, designed algorithmic trading tools for futures markets, and then built software that generates futures trading strategies. I marketed it myself and sold packages to roughly five clients, producing four-figure revenue. I also took on contract work converting clients' manual trading strategies into automated algorithms, which is an exercise in listening carefully to how someone makes decisions and then defining those rules precisely enough that a computer can execute them without error. Nobody assigned me any of that. I found the problem, learned the tools, and shipped something people paid for. I am comfortable in Python and C#, I have published a mobile app called Agora on Google Play, and I am eager to apply AI tools like Claude and Cursor to make reporting and forecasting faster and more accurate, which your posting calls out directly.

I want to be upfront that my experience is less traditional than the three years of FP&A your minimum requirements describe. What I offer instead is a record of finishing hard things independently and correctly. I founded Rodriguez Pressure Washing LLC and have run every part of it since 2023, from knocking on more than 1,000 doors to scheduling, buying and maintaining equipment, and keeping customers coming back. During my internship at Edward Jones I validated client records and researched investment strategies for senior management, work where small mistakes are not acceptable. Playing D1 soccer for a team ranked third nationally in the NAIA, and earning the Champions of Character Award, taught me what "Win as a Team" means in practice: prepare, do your job, and make the people around you better.

I am hardworking, I learn fast, and I take real pride in getting things right the first time. I would welcome the chance to talk about how I can help Samsara's R&D organization manage its spend and build for the long term. Thank you for your time and consideration.

Sincerely,

Diego Rodriguez
