Coinbase Global, Inc.
Institutional Prime Finance Team
One Madison Avenue, Suite 2400
New York, NY 10010

Dear Coinbase Prime Finance Team,

Your posting says the bar is high and the environment is intense, and that you like it that way. So do I. I spent three years as a solo quant developer building and selling algorithmic trading tools for futures markets, where every mistake in the code shows up in someone's account, and I played D1 soccer for a team ranked third nationally in the NAIA. I know what it is to be measured every day. The Prime Financing Trading Analyst role, trading the financing book, optimizing net interest margin, and working directly with institutional clients, is the kind of seat where that pressure is the point, and I want it. I hold a BS in Computer Science with a 3.8 GPA and am currently pursuing an MS in Finance and Investment Management at Sacred Heart University.

The requirement I meet most directly is Python applied to trading analytics. From 2022 to 2025 I taught myself MQL5 and NinjaScript, designed algorithmic trading tools for futures markets, and built software that generates futures trading strategies. I marketed it myself and sold packages to roughly five clients, producing four-figure revenue. I also did contract work converting clients' manual trading strategies into automated algorithms, which meant sitting with a trader, extracting exactly how they made decisions, and encoding those rules precisely enough that a machine could execute them without error. That is client-facing quantitative work: understand what the client actually needs, build it, and be accountable for the result. Futures are a margined product, so the markets I built for run on margin mechanics, which gives me a working foundation for the margin financing side of your book. I am proficient in Python, comfortable in C#, and I use generative AI as a tool with my own judgment on top of it, never as a substitute for it.

I will be direct about the gaps. I have not worked at a bank, broker-dealer, or exchange, and I have not traded repo or securities lending. Those are things I would need to learn, and learning fast is the pattern of my career: two trading languages from zero to paying clients, a published mobile app called Agora, and a business I founded, Rodriguez Pressure Washing LLC, that I have run end to end since 2023, including knocking on more than 1,000 doors to build it. During my internship at Edward Jones I validated client records and researched investment strategies for senior management. I am also bilingual in Spanish.

I am hardworking, I learn fast, and I take real pride in getting things right the first time. If you are open to a candidate who brings a real trading-technology background and unusual drive rather than a prime brokerage resume, I would welcome the chance to talk. Thank you for your time and consideration.

Sincerely,

Diego Rodriguez
